Lesson 1. Introduction of renewable energy technologies

Question Bank

1. Solar energy can be converted into _____ and _____ forms of energy.

2. India's wind energy potential is _____ MW

3. Heat is used in the conversion of biomass into various end use energy forms in _____ conversion route.

4. Biochemical conversion technologies utilize _____ during the conversion of biomass to end use forms of energy.

5. _____ process which converts vegetable oils to biodiesel.

6. Explain various energy conversion routes from biomass.

7. Give a short note on applications of solar energy.
