

Questions:

1. What are the assumptions of the Linear growth model?
2. Explain the construction of the model
3. Draw the curve of Linear growth model
4. Give the meaning of the Parameters
5. What are the applications of the Linear growth model
6. What is Exponential growth model?
7. What are the assumptions of the Exponential growth model?
8. How will you construct the Exponential growth model?
9. Draw the graph of Exponential model
10. Give the applications of the Exponential model
